25X1A6a

1. Fortification work is being carried out in Silesia. Concrete bunkers with two outlets are under construction. The bunkers are connected with each other by means of trenches in which MG emplacements are being made.
2. Fortifications are being built along the following lines: Przemkowo - Zwrotowo - Zagan (Sagan) - Zarow. North and south of these localities there are lines of bunkers.
3. It is reported that in the south bunkers were built at Luban (Lanban) and Jelenia Gora (Hirschberg). Construction work was already started early this spring.

25X1A6a

Comment: Earlier reports mentioned the fact that intensive fortifications, facing west, are being carried out in Lower Silesia.)
